

Experiment 4

Aim: EXPERIMENT-4

AIM: To add links, list and menu to the webpage.

LINKS:

HTML links are hyperlinks.

You can click on a link and jump to another document.

When you move the mouse over a link, the mouse arrow will turn into a little hand.

Links are found in nearly all web pages. Links allow users to click their way from page to page.

A link does not have to be text. It can be an image or any other HTML element.

A link does not have to be text. It can be an image or any other HTML element.

LIST:

→ ORDERED LIST

An unordered list starts with the tag. Each list item starts with the tag.

The list items will be marked with bullets (small black circles) by default.

The CSS list-style-type property is used to define the style of the list item marker

Value Description

disc Sets the list item marker to a bullet (default)

circle Sets the list item marker to a circle

square Sets the list item marker to a square

none The list items will not be marked

→ UNORDERD LIST

If you are required to put your items in a numbered list instead of bulleted, then HTML ordered list will be used. This list is created by using tag. The numbering starts at one and is incremented by one for each successive ordered list element tagged with .

Benefits of reading

1. Children who read often and widely get better at it.

After all, practice makes perfect in almost everything humans do, and reading is no different.

2. Reading exercises our brain.

Reading is a much more complex task for the human brain rather than watching TV, for example. Reading strengthens brains connections and builds NEW connections.

3. Reading improves concentration.

Children have to sit still and quietly so that they can focus on the story when they are reading. If they read often, they will develop the skill to do this for longer.

4. Reading teaches children about the world around them.

Through reading a variety of books children learn about people, places, and events outside of their own experience.

5. Reading improves vocabulary and language skills.

Children learn new words as they read. Subconsciously, they absorb information on how to structure sentences and how to use words and other language features effectively in their writing and speaking.
